

Forces

Science · Year 7

Name: _____ Class: _____ Date: _____

Instructions: Answer all questions.

Lesson 1: What is a force?

Learning objectives

- Describe forces as pushes or pulls
- Identify contact and non-contact forces

Key vocabulary: force · newton · contact · non-contact

1. Force is measured in: *Tick one box.* [1]

- ☐ **A** newtons
- ☐ **B** kilograms
- ☐ **C** metres

2. Gravity is a non-contact force. *Tick true or false.* [1]

- ☐ True ☐ False

3. Explain the difference between a contact and a non-contact force. [2]

Lesson 2: Balanced and unbalanced forces

Name: _____

Date: _____

Learning objectives

- Calculate resultant force

Key vocabulary: resultant · balanced

1. A 10 N force pushes right and a 4 N force pushes left. What is the resultant force? [2]

2. When forces are _____, an object's motion does not change. [1]

Answer key – Forces

Lesson 1: What is a force?

1. A – newtons [1]
2. True [1]
3. Contact forces act when objects touch; non-contact forces act at a distance. [2]

Lesson 2: Balanced and unbalanced forces

1. 6 N to the right [2]
2. balanced [1]
